

Lyceum expands curriculum

Lyceum students filled the AVR for the e-learning kick off ceremony

Prof. Leonida T. Africa, VPAA welcomes the students to their new venture.

Dean Vicente Pijano of the College of Computer Studies delivers an overview of the e-learning program

Students feed their curiosity on e-learning.

Lyceum of the Philippines, one of the country's biggest universities, recently signed a three-year contract with Yapster e-Learning further expanding their curriculum as they offer e-learning courses to their students.

Starting November this year, Lyceum will be providing students with the International Computer Driving License (ICDL). The IC DL is a basic course on computer usage covering word processing, spreadsheets, presentations, computer basics, and the World Wide Web. Other courses offered include basic presentation and writing classes.

"We are very happy to now offer e-Learning classes to our students. As a center for academic excellence, Lyceum continuously wants to improve our techniques and offerings," Mr. Vicente Pijano stated.

Yapster e-Learning is the premier provider of web-based training that has installed the e-Learning facilities enabling Lyceum to manage and monitor learner's progress through the use of the Internet.

Established September of 2001 through www.2StudyIT.com, Yapster e-Learning boasts a library of over 1,000 business and IT courses.

Faculty and students can't get enough of e-learning.

"We are very happy to now offer e-Learning classes to our students. As a center for academic excellence, Lyceum continuously wants to improve our techniques and offerings."
